

### **3 Peat**

(Please apply to 3 below) Distill - Distill distributes 15% of its water to CA (from the facts). Therefore it appears that Distille had minimum contacts with forum.  
2-Whether he purposely availed himself of the benefits of the forum.

Van-Van placed himself in the flow of traffic of people whom he knows may very well reside in other states. It may very well be reasonable to believe that Van anticipates selling more water to out of states than in states in that in states might simply wait until they get home from the airport than a purchase a (high) priced bottle of water at the airport. Therefore, Van appears to have been purposely availing himself of the thirst/need of citizens of other states to include CA.  
(PEAT and . . . )

(Please apply to 3 below) Distill - From the facts Distille distributes 15% of its water to CA. In other words Distille is availing itself of 15% of its business in CA. Therefore Distille is purposefully availing itself with the forum. CA.

3-whether he could have reasonably anticipated being called into the forum.

Van-Similarly with the wide ranging contacts that Van was establishing Van should reasonably expect to be called into many jurisdictions if he sells un-healthy products that are consumed by the citizens and they get sick. (. . . Repeat)

(Please apply to 3 below) Distill - Distill should reasonably anticipate being called into any forum to which they sell products (if the product is unhealthy). Ca is one of those forums (15%). Therefore Distille could reasonably anticipated being called into the forum.

You've REALLY pushed the envelope here - can't examsoft do that instead of me?  
This is not a way to get the reader "comfy" with your work product. Incorporation by reference is dangerous tactic.
