

SOB2

Transfer to Arizona

The third issue involves whether the case should be transferred to Arizona. The first step is to make sure that Pam picked the proper venue to file her suit. *No: that'd be 12b3 mo dis on back venue. This is 14042 xfer to AZ.* There are two rules as to where the proper venue of any given suit may be: the claim can be brought where a substantial portion of the claim arose or where all the defendants reside. According to the fact pattern, Pam claims that she did not get sick until she arrived in California. Even though she bought the water in Arizona, the illness that she is basing her claim on occurred in California. So, according to the first rule, Pam filed her case in a proper venue. (Not the issue presented)
